

# We're Saving you a Seat in Worship!

Music is a great way to praise God which is one of the things we do in worship. Listen to the music in worship today. Create your own song to God by putting notes on this music staff. You can put circles in the spaces or on the lines.

## Parent Tip:

Children are naturals at praising God through music. Their little bodies just naturally move to music.

Some tips for helping children participate in worship through music:

- Invite your child to sing the repeated choruses if the song/hymn has one.
- Show your child how to tap his finger quietly to the beat of the song.
- Invite a child to draw a picture to the music, showing what it means to her.
- Don't sing all the time. Occasionally, hum or la-la, even whistle a hymn together. This way children can participate and begin learning the tunes without the words.
- Choose a word in the song that is repeated (glory, Holy, Jesus, etc.) and invite your child to squeeze your hand each time they hear that word in the song. This encourages them to listen and appreciate the words of our hymns/sacred songs.
